

DIRECTLY AVAILABLE:

1 PC. USED DELMAG HYDRAULIC DRILLING MACHINE, RH 0912 INCL. BAUER BG7 HYDRAULIC ROTARY HEAD.

Base carrier	CASE POCLAIN P170
Year of Manufacture	1990/1991, only 1.800 running hours !!!
Engine:	Deutz BF6L 513 R 178 kW / 242 HP
Max. allowed torque	90 kNm
Winch 1	Zöllern 55 kN / 5,5 tons (0–71 mtr/min.)
Winch 2	Zöllern 55 kN / 5,5 tons (0–58 mtr/min.)
Brake valves	Beringer
Fuel tank capacity	375 liter
Max. drill diameter	In Kelly Bar excl casing, 1300 incl. 900 mm
Max. inclination	1:4 (14° backwards), 1:15 (3,8° forwards), 1:8 (9,5° sideways) All subject stability, max. allowed weights and well soil conditions.
Max. pile weight	In case of pile driving, the total weight is maximum 10-11 tons for hammer and pile.
Max. pile length	In case of pile driving the maximum pile length is subject the type and length of hammer but in most cases about 12-13 mtr. Piles should be able to be driven.
Transport dimensions	LxWxH (including full leader, leader head) 20.250x3.000x3.300 mm
Transportweight	42000 kg (excluding rotary head)
Rotary head	Bauer BG 7, Group 34
Hydraulic motors	2 pieces Rexroth / Hydromatik
Weight	2.150 kg
Max. torque	70 kNm / 7 ton/mtr.
Suitable for	Kelly Bar drilling, CFA (swivel not included), Partial Displacement drilling (1 casing 273 - 324mm included).

Machine was kept as a spare machine for emergency jobs only
 And has only 1.800 running hours. Original books and spare parts
 Manual of the machine and base carrier are included.

Price for this Delmag is available upon request & depends on required accessories
